Lashing track / combi-track

Product information

The combi lashing track is a versatile lashing track that combines round anchor points and attachment points for combi track fittings in a single track. This allows the use of a wide range of lashing strap end fittings, making it an excellent solution for equipping the cargo areas of commercial vehicles. Its durable construction is designed for demanding professional use in vans, trucks, trailers, and other transport applications where a versatile lashing system is required.

Especially suitable for

- Combi track fittings
- Equipping the cargo areas of vans and trucks
- Body building for trailers and other commercial vehicles
- Safe load securing with a variety of lashing strap end fittings
- Applications requiring multiple attachment options within a single track

Product features

- Combines round anchor points and attachment points for combi track fittings in one track
- Compatible with a wide range of lashing strap end fittings and lashing accessories
- Durable construction for professional use
- Suitable for a wide variety of load securing applications
