Dunnage air bags

Product information

Haklift Stevedore bags are used to loading containers, trucks and ships as well as in the luggage compartments of trains and busses, when goods have to be loaded tightly and immobile. Stevedore bag material is strong 100 % recycled material. The bag has two layers. Stevedore bag is easy to empty after use and therefore each bag can be used multiple times. Stevedore bag is simple and quick to fill with an inflator gun fitting to a compressor.
