Stop Load

Product information

Retaining net at the end of dry container loading, for blocking the pallets when the doors are opened. In standard version, composed of 2 vertical straps, height 2m40 and 2 horizontal straps of 5m. The horizontal straps are equipped with a sewn ratchet tensioner to ease the tensioning of the system. The STOP-LOAD net can be used in the event of a complete or incomplete container and made to measure to adapt to all types of loading, and high cube containers.
